

LifeVac-

Purchased for
Viscount Beaumont's
by our wonderful PTFA

Dear Parents,

Our wonderful PTFA have kindly bought the school both a wall mounted Life-Vac anti-choking device and a travel device through The Oliver Steeper Foundation.

This also includes training which all school staff will complete.

What is it?

LifeVac is a portable Non-Invasive device designed to quickly dislodge obstructions from the airway when someone is choking. Potentially saving lives when traditional methods such as Heimlich manoeuvre, are non effective.

Why do we need it?

Having a LifeVac in school will help staff respond swiftly and effectively following on from first aid being administered when someone is choking, reducing the risk of severe injury or fatality in these critical situations.

The LifeVac has saved over 3000 lives!!

To find out more about The Oliver Steeper Foundation please search <https://www.tosf.org.uk/>
To purchase a device for home please search www.lifevac.uk/shop and add 'OF10' for 10% off or buy direct from the Oliver Steeper Foundation via <https://www.tosf.org.uk/category/lifevac-anti-choking-kits>

We hope this is never needed, but hope it gives you the peace of mind that it is there!

If you have any questions on the device or would like to see it, please contact Mrs Bee in the school office.
